

General AML

4th International Conference on Acute Myeloid Leukemia "Molecular and Translational": Advances in Biology and Treatment

 Cynthia Umukoro | Sep 26, 2016

The European School of Hematology (ESH) is a not-for-profit institution dedicated to increasing knowledge in hematology and related disciplines at the European level. The ESH Conferences are known for their state-of-the-art science and new developments in hematology.

The next conference on "*Molecular and Translational advances in Biology and Treatment*" is chaired by international experts in AML including two members of the AGP steering committee, Dr H. Döhner (Germany) and Dr M. Tallman (USA).

The conference will focus on the molecular techniques, which are creating novel insights into the biology and therapeutic perspectives of AML. Molecular diagnosis, genomic and epigenetic studies have allowed a better understanding of the pathobiology of the disease and identification of major pathways of malignant transformation leading to development of novel therapeutic approaches.

There will be expert panel sessions, poster sessions and a varied scientific programme. This conference promises to be a cutting-edge event in the field of hematology.

The event will take place on October 5th - 7th, 2017 in Estoril, Portugal
